

ASSIGNMENT-1

Student Name	P.JAYASHREE
Student Roll Number	951919CS031
Team ID	PNT2022TMID13229

1. Create registration page in html with username, email and phone number and by using POST method display it in next html page.

Register.html

```
<html>

<head>

    <title> Registration Page</title>

    <meta http-equiv="Content-Type" content="text/html; charset=UTF-8">

</head>

<body>

    <h1>Registration Page</h1>

    <form action="Register.php" method="POST">

        <label for="User Name">User Name:</label>

        <input type="text" name="User Name"> <br/>

    <br/>

        <label for="Email">Email:</label>

        <input type="Email" name="Email"> <br/>

    <br/>

        <label for="Phone Number">Phone Number:</label>

        <input type="Phone Number" name="Phone Number"> <br/>

    <br/>
```

```
<input type="submit" value="Register!">
</form>
```

```
</body>
```

```
</html>
```

Register.phpRegister.php

```
<?php
```

```
echo "You have submitted, User Name: " . $_POST['User Name'] . ", Email: ".
$_POST['Email']. " andPhone Number: ".
$_POST['Phone Number'];
```

```
?>
```

2. Develop a flask program which should contain atleast 5 packages used from pypi.org. import os import.

```
shutil
```

```
import pytest from flask import render_template,
```

```
render_template_string, request from jinja2.exceptions import
```

```
TemplateNotFound from jinja2.sandbox import SecurityError from
```

```
werkzeug.test import Client
```

```
from CTFd.config import TestingConfig
```

```
from CTFd.utils import get_config, set_config
```

```
from tests.helpers import create_ctfd, destroy_ctfd, gen_user, login_as_user def
```

```
test_themes_run_in_sandbox():
```

```
    app = create_ctfd() with
```

```
    app.app_context():
```

```
        try:
```

```
            app.jinja_env.from_string(
```

```
                "{{ ().__class__.__bases__[0].__subclasses__()[40]('./test_utils.py').read() }}"
```

```

        ).render()

    except SecurityError: pass

    except Exception as e: raise e
