NEWS TRACKER APPLICATION

DATE	3 September 2022
Team id	PNT2022TMID13229
Project title	News tracker application

INTRODUCTION

With the rapid development of the Internet and its permeability, people get to know the latest news through online media, blogs and news feeds. Nowadays, news reading is an indispensable daily activity of many people. With the recent popularity of smart mobiles and the rapid development of the mobile Web, more and more people tend to read news online via their mobiles or other handheld devices, e.g., tablets. However, due to the huge volume of news articles generated every day, readers cannot afford to go through all the news online. So, news recommendation systems, which aim to filter out irrelevant online information and recommend to users their preferred news, have been widely studied. For easy organization, news aggregators that allow a single place to view news from various sources using API.

LITERATURE SURVEY

S.No	Paper Title	Author(s)	Month /Year	Method/Implementation technique(s)	Resource Link
1.	Exploring mobile news reading interactions for news app personalisation	Marios Constantinides, John Dowell, David Johson, Sylvain Malacria	August , 2015	1. Identification of news reader types. 2. Interaction logging and classification study. 3. Deployment and data collection. 4. Predicting News reader types. 5. Adaptive UI	Exploring mobile news reading interactions for news app personalisation (researchgate.net)

2.	Detection and Tracking in News Articles	Sagar Patel, Sanket Suthar, Sandip Patel, Neha Patel	March, 2015	1. Preprocessing 2. Tokenization 3. Stemming/Lemmization 4. Vector Space 5. Model Topic tracking	(PDF) Topic Detection and Tracking in News Articles (researchgate.net)
3.	Following the Fed with a News Tracker	Michael William McCracken	January, 2012	The paper is not a technical paper but is essentially a statistical paper on how should one conclude whether the data have come in stronger, weaker or as expected. This is based on the CitiGroup U.S Economic Surprise Index.	(PDF) Following the Fed with a News Tracker (researchgate.net)
4.	An End-to-end Weakly supervised News Aggregation Framework	Xijin Tang, Xiaohui Huang	June, 2022	The framework combines Snorkel based weakly supervised classification, Latent Dirichlet Allocation (LDA) topic modeling, and topic signal detection model to classify and aggregate unlabeled news texts and ultimately generate visualized results containing news categories, news topics, and temporal topic relationships. This paper uses constructed knowledge thesaurus and the Snorkel method to weakly supervise the classification of unlabeled news with	www.researchgate.net/publication/361087328_An_End- to-end_Weakly-supervised_News_Aggregation_Framework

				no manual tagging. Subsequently, we utilize LDA to generate the topics and obtain the signal value of each topic based on the topic signal detection function. Finally, we establish the temporal topic relationships and get the visualized results of news aggregation.
